

# the power to change

Now there's a POS workstation that lets you decide what specific features and software work best for you. Stingray from Panasonic – the POS workstation with the power to change. Only Stingray offers a truly open platform including both software and hardware. So you can build and change Stingray the way you want with the software of your choice. And the combination of modular components you need. Just a few reasons why Stingray delivers the lowest total cost of ownership. It's design innovation from Panasonic – the company with nearly a million POS solutions placed worldwide.

Put the power to change to work for you with Stingray. Only from Panasonic.

**Stingray**

Open architecture runs any software

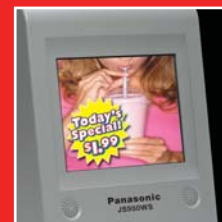

Highest speed processor

User changeable LCD display

Field replaceable hard drive

LCD POP display / order verifier

# the POS workstation with the power to change

Stingray's outstanding performance, unique design and durable construction deliver the power to change. So you can customize Stingray to your exact requirements when you want, and make changes quickly and conveniently on-site. It's the industry's ideal formula for lower total cost of ownership.

## open architecture

Implement virtually any off-the-shelf or custom POS application to meet your specific needs. For stand-alone or networked applications, Stingray delivers lower total cost of ownership with backwards compatibility and multiple software functionality.

## modularity

Hardware customization is cost-effective and convenient with Stingray. Choose the unit you need today and upgrade tomorrow with a selection of components with virtually no downtime and no need for a technician.

## durable and reliable

Built to withstand spills, static, dust, dirt, shock, grease, extreme temperatures and humidity, Stingray has the durability and reliability that make it the smart economic choice.

## user-changeable LCD display

- adjustable, dual back lit LCD display
- high-resolution, high-contrast images for faster, more accurate order taking
- available in 12" or 15"
- resistive or capacitive touch screen technology
- 15" LCD anti-glare touch screen display can be oriented as portrait or landscape

## highest-speed processor

- runs virtually any application
- upgradeable RAM to run multiple applications

## field-replaceable hard drive

- customizable 3<sup>1</sup>/<sub>2</sub>" or 2<sup>1</sup>/<sub>2</sub>" hard drive, compact flash (CF) card, or 2<sup>1</sup>/<sub>2</sub>" hard drive with CF card

## POP display/order verifier

- rear-facing, 2 or 4 line optional customer order confirmation displays improve order accuracy
- optional full-sized touch screen rear LCD display for promotions and improved order confirmation/accuracy

## magnetic card reader

- optional magnetic card reader can be mounted in two different positions
- supports 3 tracks of information, allowing acceptance of credit, debit, gift, loyalty, and crew cards

## security features

- integration of security solutions such as fingerprint/biometric readers and Dallas key systems for operator ID verification
