# Stingray and XPIENT at your service

xpi<sup>ent</sup>  
SOLUTIONS

*Stingray*

**modular hardware design –  
easy-to-use software application**

Stingray – Panasonic’s workstation with the power to change – offers the complete POS solution with XPIENT software.

Stingray allows you to configure your own workstation based on the features you need. Engineered with components you can easily replace yourself, Stingray’s unique modular design simplifies servicing, decreasing the time and expense of service calls and service contract fees, and lowering the total cost of ownership.

XPIENT’s easy to use software application is flexible and adaptable to your business. The uniquely configurable touch screen technology speeds employee training and performance, and optimizes order accuracy and speed-of-service. XPIENT’s intuitive graphical application is designed to enhance efficiencies and improve throughput by optimizing kitchen coordination.

Together, Stingray and XPIENT give you the power to change the way you do business.

## Panasonic Stingray with XPIENT Software

Stingray's unique all-in-one modular design allows convenient, cost-effective customization to meet specific application needs. Upgrade RAM, swap hard drives, remove/replace the LCD display or switch the display from landscape to portrait with no need for a technician.

Together with XPIENT software, Panasonic offers a comprehensive end-to-end solution including Point of Sale, back office capabilities and 24/7 support via XPIENT's multi-lingual Help Desk. Maintenance customers have access to all updates - even for new software versions - a unique benefit provided by XPIENT.

### Select Stingray features & benefits:

- customizable 3½" or 2½" hard drive or compact flash (CF) card
- 512 MB of RAM upgradeable to 2 GIG of RAM runs multiple applications
- adjustable, dual back lit resistive or capacitive touch screen LCD display provides high-resolution images for faster, more accurate order taking; available in 12" or 15"
- 15" LCD anti-glare touch screen display can be oriented as portrait or landscape
- rear-facing, 2 or 4 line customer order confirmation display to improve order accuracy
- integration of security solutions such as fingerprint/biometric readers and Dallas key systems for operator ID verification
- purpose-built to withstand spills, static, dust, dirt, shock, grease, extreme temperatures and humidity; quality-tested for the foodservice environment
